Please expand space according to answer

1- Problem Identification:

Identify a real-world problem or a market gap that can be addressed through your project. This is the foundation of any entrepreneurial venture.

1- Product Market Analysis:

Conduct thorough market research to understand the target audience, competitors, and potential customers for your proposed solution.

2- Unique Value Proposition:

Define the unique features or advantages of your project that differentiate it from existing solutions in the market. This will help you to understand your competitive advantage

3- Features:

Write the overall features to solve problem.

4- Revenue Generation:

Explore different revenue streams for your project, such as subscriptions, advertising, or partnerships. This will help you to understand the financial viability of your entrepreneurial venture.

5- Marketing and Sales Strategy:

Develop a plan for marketing and selling your product or service. This includes identifying target marketing channels, customer acquisition strategies, and pricing models.

6- Risk Assessment:

Identify potential risks and challenges associated with your project. This can include technical, market, or financial risks to develop mitigation strategies.

7- Scalability and Growth Potential:

Analyse the scalability and growth potential of your project. This involves considering factors such as market demand, scalability of technology, and expansion opportunities.

8- Implementation and Execution Plan:

Develop a detailed plan for implementing and executing your project. This can include milestones, timelines, resource allocation, and team roles. Remember, the ultimate goal is to understand how your FYP can be transformed into a viable and sustainable entrepreneurial venture.
